

IT Solutions For Educational Institutions

The following are the features of IT Solutions for Educational Institutions.

Online Classes:

As students are unable to attend classes due to present situations of COVID-19, our solutions can enable educational institutions to conduct online classes where teachers can conduct classes online where all the students can participate in the learning. The following are the features of Online Classes in our solutions.

Let us see how schools can ramp up remote learning programs quickly with Microsoft Teams.

As COVID-19 has impacted the lives of people around the world, some schools look to continue learning remotely for the safety of their students and faculty, Microsoft Teams for Education provides an online classroom for students and teachers can find new ways to continue to focus on learning. Teams provides an online classroom that brings together virtual face-to-face connections, assignments, files and conversations into a single place accessible on either mobile, tablet, PC or browser.

We have heard incredible stories about how educators are supporting students and have also received questions regarding how students and educators can stay connected using technology. We want to take this time to share some of the ways you can stay connected and engaged with classrooms and faculty during this time.

To learn more about Microsoft Teams and how to get started, you can contact us to implement the solution in your educational institution.

Online classes & lectures with all your students:

Explore how you can create a persistent online classroom with meetings for up to 250 students.

Online meetings with student groups or anyone via their email:

You can create ad-hoc meetings with selected groups of students and will cover virtual office hours, tutoring sessions, and other group meetings.

IT Admins – Online education and business continuity:

You deploy and manage Teams for students, faculty, and staff. IT Administrators can set up Teams for online meetings, collaboration, and more.

Once Teams is enabled, students and faculty can start using it by entering their school email address at teams.microsoft.com.

We are learning so much from schools all around the globe that are enabling remote learning in ingenious ways and you can learn more about Microsoft Teams for Education here. No matter which tools you use, we wish your students, faculty, staff, and families all the best.

- E-learning remotely with Microsoft Teams.
- Web versions of Word, PowerPoint, Excel, OneNote, and Outlook. Your teams can work on these MS Office Applications online and the data is stored in the cloud anytime accessible from anywhere with utmost digital security provided by Microsoft.
- Desktop version of OneNote is a program for free-form information gathering and multi-user collaboration. It gathers users' notes, drawings, screen clippings, and audio commentaries. Notes can be shared with other OneNote users over the Internet or a network
- Microsoft Teams, a digital hub that integrates the conversations, content, and apps your school needs to be more collaborative and engaged. It is a unified communication and collaboration platform that combines persistent workplace chat, video meetings, file storage (including collaboration on files), and application integration. The service integrates with the Office 365 subscription office productivity suite and features extensions that can integrate with non-Microsoft products. Microsoft Teams is a competitor to services such as Slack and is the evolution and upgrade path from Microsoft Skype for Business.
- Class and Staff notebooks can be maintained digitally
- Professional Learning Community (PLC) groups. Schools, Students and Teachers can access learn through learning communication groups.
- Self-grading quizzes with Forms. This section will have quizzes with forms etc.

- Digital storytelling with Sway which is a presentation program and is part of the Microsoft Office family of products
- Inform and engage with communication sites and team sites throughout your intranet using SharePoint
- Compliance solutions with a unified eDiscovery center
- Rights management, data loss prevention, and encryption
- Enterprise video service for creating, managing, and sharing videos securely across an organization
- App development without writing code to extend business data quickly with custom web and mobile apps
- Workflow automation across apps and services to automate business processes without writing code
- Plan schedules and daily tasks with Microsoft Teams
- Email with 50 GB mailbox
- Unlimited personal cloud storage
- HD video conferencing
- Maximum number of users: 500 (Rs 100 per user/per month if exceeded)
- Unlimited email storage with In-Place archiving
- Advanced email with archiving and legal hold
